

Investigation n°1

After each sequence of **4 dinners**, Nestor Tip offers you to carry out a little investigation... to find a **mystery character**.

Only the players who have found the "**presidents**" of the 4 dinners concerned will have the keys necessary to find this solution ... which brings in a jackpot of **200** points.

This explaining that, each series of **4 dinners + the matching survey** allows players to reach a maximum score of **1,000** points.

To help you with each investigation, Nestor Tip will call on a different specialist each time. Ready for your first survey?

Step 1

Here are 3 clues to discover the hero who will help you for this first investigation:

- We are looking for a fictitious man who has an **8 letter** first name and a **6 letter** last name. His initials are **S.H.**
- His knife is 30 and his fork is 27.
- None of the **4 vowels** appearing in the first name of the two actors illustrated below appears in the identity of the character sought.

Step 2

When you find your assistant's name, write down the **year** it first appears in a novel by A.C.D.

This year will be your “**cherry**” value.

Step 3

Add the **numbers** of the 4 celebrities who had the honor of presiding over the first 4 dinners of our game (dinners 1, 2, 3 and 4) to find the “**kiwi**” value.

Step 4

Add the years of birth of these 4 presidents and **multiply** your total **by 2** to find the “**pear**” value. NB: for a fictional character, the year to be taken into account is that of his first appearance, all media combined.

Step 5

Add the cherry and the kiwi to find the **pineapple**.

Step 6

Now subtract the pineapple from the pear to find the **lemon**.

Info: the **terminal** letters are the last letter of the **first name** and the last letter of the **last name**. Example: the terminal letters of Nestor Tip are **R** and **P**.

Conclusion

The **lemon** is the **postal code** of the mystery character's **city**.

Its identity consists of **8 letters**. And these letters, you can check them as follows: they are the **8 terminal letters** of the **4 celebrities** who presided over dinners n°1, 2, 3 and 4. Found? Send your answer quickly to Nestor!
